Sociology turned out to be my go-to subject - I only decided to focus on it three months prior to the exams, but once I got into it, I didn't find studying a chore. The heavy content load was manageable because it genuinely interested me. With a short time frame of just three months to learn and revise, I had to think strategically and work efficiently. To tackle the lengthy book with excessive information, I primarily relied on online resources listed in "sites + sources" while learning the material. During this process, I also read chapter recaps to stay on track. For revision, the Cambridge learner guide helped me cover all necessary topics. What really solidified my understanding was working through past paper questions and answering them based on the provided mark-schemes. I'll share my tips on how to tackle questions in the "Tips + Advice" section, including advice on point allocation and pre-writing essay plans to ensure well-written and comprehensive responses.
